About US

Bailey Safety understands the day-to-day concerns and impact of managing company safety programs. With staff offering more than 15 years of cross-industry experience, we will provide practical and cost-effective solutions that will achieve positive results in safety experience, profitability and improve competitiveness in the marketplace.

Association & Certification

CORE COMPETENCIES

Consultation

Having a safety manual and training your people are important first steps, but don't forget to inspect and review your safety program. We have found that contractors that utilize Jobsite Hazard Analysis and conduct Jobsite Audits have fewer accidents and receive fewer and lesser fines from OSHA.

Training

•Advanced Fall Protection	•OSHA 10
•AWP Fork-Lift Scissor Lift	•OSHA 30
•Arc Flash	•Respirator Training & Fit Testing
•Confined Space	•Scaffold
•EM 385-1-1	•SILICA
•First Aid CPR AED	•Trench and Excavations

Performance

After your inspection yesterday, you had our guys tie off correctly. OSHA showed up on the job right after you left. The only thing they told our guys was to not drag the ropes in water. You saved us a nice fine, and we can't thank you enough. Nancy goes to show that having Bailey Safety doing random inspections is worth every penny. You are part of our team and a great asset to Palmer Roofing.

- Billy Palmer, Palmer Roofing and Sheet Metal
