

BAILEY SAFETY

Confined Space Training

Overview: This course is intended to meet the requirements established by OSHA for those who are to enter and perform work in confined spaces in the construction industry.

This training will cover the new Subpart AA Standard (effective 8/3/15)

Objectives:

- Have an understanding of OSHA's definition of a confined space
- Be familiar with the classification of confined spaces and how to enter each
- A review of OSHA's Permit Required Confined Space Program (PRCS)
- Know what rules and duties an entrant, attendant and Supervisor have in the PRCS Program
- An introduction to various personal protective equipment requirements for confined space entry
- Familiarity with various documentation efforts with the forms used
- Understand the atmospheric monitoring requirements for confined space use of a gas monitor
