## Scaffold Training

Anyone working on, erecting or dismantling Scaffold must be trained. Even if you hire a company to install the scaffolding, your employees are still required to have training prior to working on or using scaffold to access other areas. Our Scaffold Training is a great way to provide the necessary training to your workers.

The training we can provide could be just an awareness for workers or a more in-depth training for supervisors or managers. It is up to you as an employer to designate a Competent Person for Scaffold use, we can provide the knowledge to the designated employee to be a competent person for Scaffold.

Training for Scaffold Awareness will cover:

1.5-2 hours

- ⇒ What to look for before using the scaffold
- ⇒ How to recognize a improperly erected scaffold
  - ⇒ If the walk boards are correct
- ⇒ When there should be fall protection of fall arrest equipment used
  - ⇒ Describe the different types scaffolds that are available
    - ⇒ How o use the scaffold

More Advanced Training for Managers, Supervisors and Competent Persons  
3 hours

- ⇒ What a competent person should know and there responsibilities
  - ⇒ The erection and dismantling of scaffolds
- ⇒ In-depth scaffold distance requirements from face of work
  - ⇒ How to insure the walking working surface is correct
    - ⇒ Proper access
      - ⇒ Proximity to power lines
    - ⇒ Weight limitations of scaffolds
    - ⇒ Requirements of mobil scaffold
      - ⇒ Work site assessment
    - ⇒ Hazard communication to employees
- ⇒ Inspection of standard and mechanical scaffolds

Training consists of the use of power points, full scale visual aids and depending on availability, hands on miniature scaffold.
